

MON-IKW

2025

Ready-to-use monitor containing all 24 stains from the IKW Laundry Recommendation.

In 2025, the German Cosmetic, Toiletry, Perfumery and Detergent Association (IKW), will release the first part a brand new IKW Recommendation for the Quality Assessment of the Product Performance of Laundry detergents. This first part contains the stains and a method to test the cleaning performance of Laundry detergents. CFT released a ready-to-use monitor containing all the stains mentioned in the standard. The product code for this is MON-IKW 2025.

At later moments, the other parts of standard will be released containing secondary performance like colour fastness and dye transfer, pilling and other tests.

This monitor shows an overview and the placement of the stains on this ready-to-use monitor.

IKW-2025

An overview of the soils

Code	Position	Soil	Code	Position	Soil
W-20 LS	1	Lipstick on polyester/cotton	CN-17	13	Cotton, cretonne, bleached, mercerized
