On Polyester

## MON-AISE A+B plus

The stainset according to the 2020 AISE protocol contains 14 different stains, from different producers. We offer these combined on a Multi Swatch Monitor called MON-AISE A+B. On top of that, we offer this same monitor with 6 additional stains: MON-AISE A+B Plus. Using this A+B Plus monitor gives an even better distinction between the performance of different detergents than the standard AISE set.

Apart from this combination that we standard offer, it is still possible to make your monitor configuration with other stains of course. The 6 additional stains all represent an interesting effect, on top of the 14 stains that are selected by the AISE committee. Please let us know if you have any further questions in this direction.

### 6 Additional stains\*

- PC-S-216 Lipstick, represents cosmetic soils and introduces another synthetic substrate.
- C-S-28 Rice Starch with colorant, is one of the most used tracer stains for testing amylase performance.
- PC-S-132 HD Sebum Bey, represents the body soils and introduces another synthetic substrate.
- E-165 Chocolate Pudding, is one of the most sold tracer stains for mannanase performance.
- KC-H009 Chocolate Ice, is also a widely used mannanase-sensitive stain.
- KC-H239 Banana/Tomato, shows some interesting pectinase sensitivity.

### ROW 1:

- C-S-15 Bil(blue)berry juice on cotton
- C-S-97 Highly discriminative tea on cotton
- C-S-07 Grass, pure on cotton
- C-01s Mineral oil with carbon black (improved recipe) on cotton
- C-S-17 Fluid make-up on cotton

### ROW 2:

- KC-H026 Red wine on knitted cotton
- KC-H109 Coffee, espresso on knitted cotton
- WE5TP Tomato puree on cotton
- C-S-406 Balsamic salad dressing on cotton
- WE5DASB Double application sheep blood on cotton

### ROW 3:

- C-S-44 Chocolate drink, pure on cotton
- PC-S-216 Lipstick, diluted, red on polyester/cotton\*
- C-S-28 Rice starch, coloured on cotton\*
- PC-S-132 HD sebum bey with pigment on polyester cotton\*
- E-165 Chocolate pudding on cotton\*
