

All Purpose Monitor SM-04 2024

improved version

Be ready for the future with the improved SM-04 2024 monitor

In order to keep up with innovations in the detergent field, we also keep innovating all our test materials. That is why we believe that this is the right moment to update the SM-04 monitor. Today's detergents are constantly being innovated. Not only because of standards in eco labeling, washing temperatures, but also developments in washingmachine programs, less use of water and modern soils. The swatches we selected for the improved SM-04 2024 monitor show the performance of newly designed enzymes even better, ready for future developments.

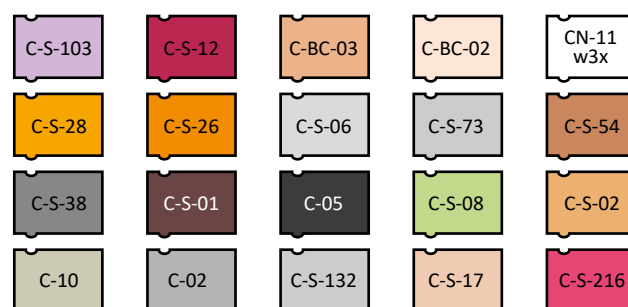

An overview of the improvements

SM-04 2024	Pos	Category	Old SM-04	Pos	Category
C-S-103	1	Bleach	C-S-103	1	Bleach
C-S-15	2	Bleach	C-S-12	2	Bleach

OLD
C-S-216 position 20

*PC-S-216 on Polyester/Cotton

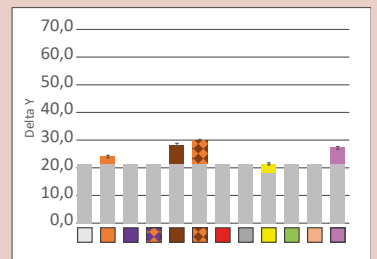

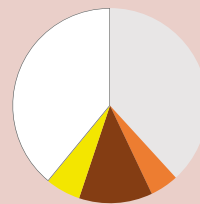

5 extra swatches

The following swatches are new to the SM-04 selection. We think these 5 swatches are a good addition to the existing swatches and the 2024 swatches.

The graphics show what is to be expected of these test-materials in your own wash tests.

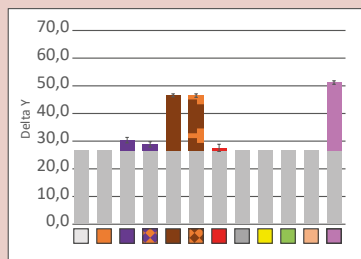

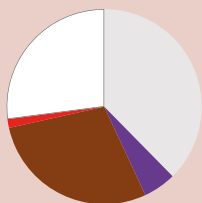

Chocolate Pudding/Dessert

C-S-69 position 10

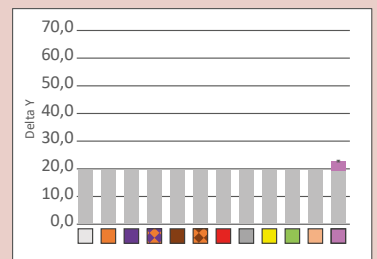

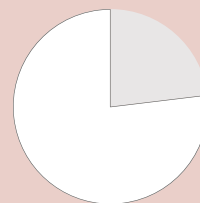

Mayonaise

C-S-05s position 11

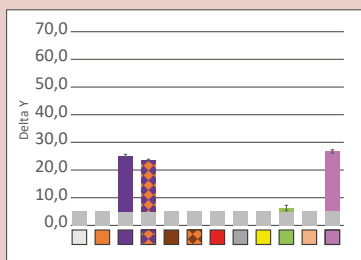

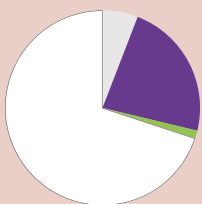

Sebum (on synthetics)

PC-S-94 position 21

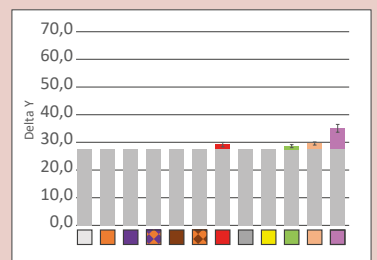

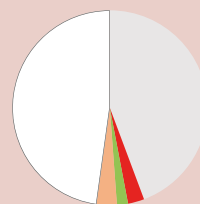

Collar Stain

C-S-98 position 22

Motor Oil

C-01s position 23

Lipase

Pectinase

Bleach

Surfactant

Builder

Syn.Full

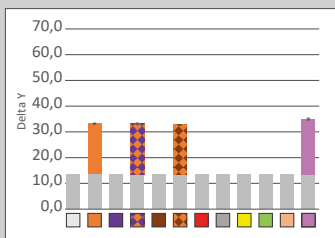

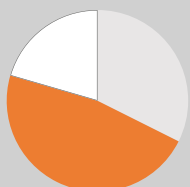

Still Soiled

The unchanged swatches

11 swatches are unchanged. We believe they still meet the demands we place on test material today. The graphics below show what you can expect.

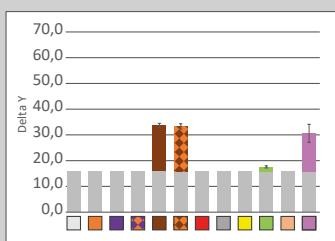

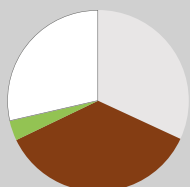

Rice Starch

C-S-28 position 7/6

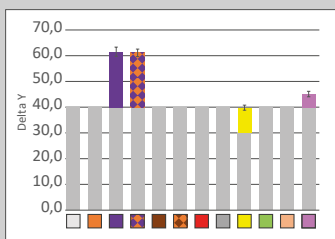

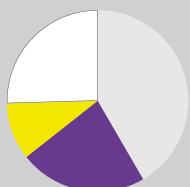

Locustbeangum

C-S-73 position 12/9

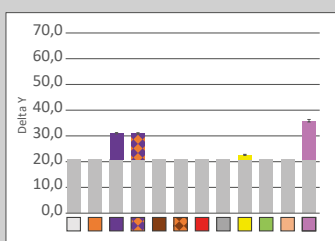

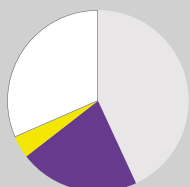

Blood

C-S-01 position 15/12

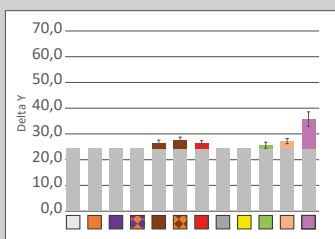

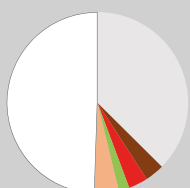

Oatmeal

C-S-54 position 17/10

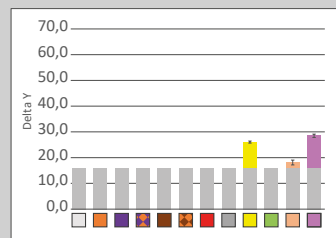

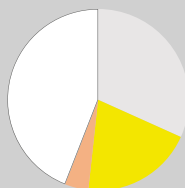

Olive Oil

C-02 position 19/17

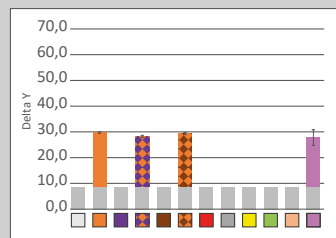

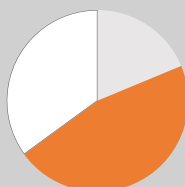

Red Wine

C-S-103 position 1

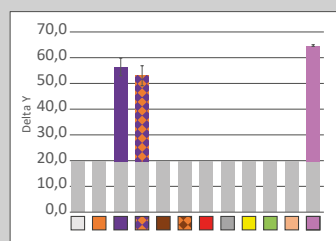

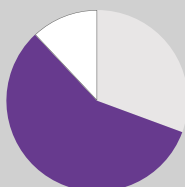

Corn Starch

C-S-26 position 9/7

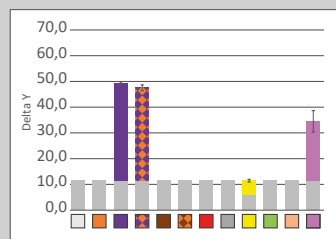

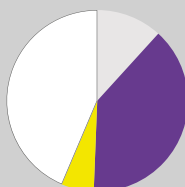

Egg (yolk)

C-S-38 position 13/11

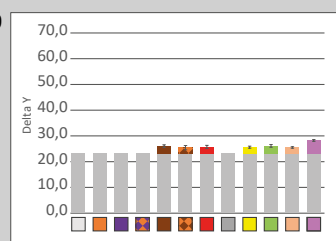

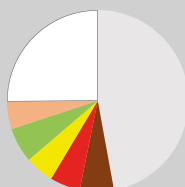

Blood/Milk/Ink

C-05 position 16/13

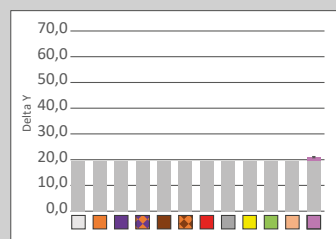

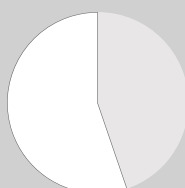

Make-up

C-S-17 position 18/19

Sebum

C-S-132 pos. 20/18
